

Press Release.

Roskilde, 22 January 2010

Dansk Fly Elektronik ApS independent again.

When I sold Dansk Fly Elektronik ApS to Air Alpha A/S January 1, 2008 everything looked bright and promising, but due to unfortunate development at Air Alpha A/S it went bankrupt in November 2009.

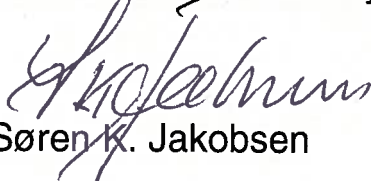

Dansk Fly Elektronik ApS was not dragged into bankruptcy, but was later sold to some Norwegian investors with some of the Air Alpha activities.

We in the Dansk Fly Elektronik ApS disagreed with the Norwegian investors way of running the company and offered to buy back the company. Which now has happened on 22 January 2010. The company will now be continued in the old spirit.

Søren K. Jakobsen is CEO, Lis Seidenfaden accountant, Bo de Fries work shop manager and Troels Lund is the leader of our design organization. Palle Hansen, Morten Norup Adamsen, Brian Jensen and Stig Christiansen will all continue as before.

We apologize for the turbulent time over the last three months, but we will continue to make customers and suppliers happy.

On behalf of Danish Fly Elektronik ApS.

Søren K. Jakobsen
